

## MJXH29×6厚度分级机

MJXH29×6厚度分级机主要在大米加工过程中清除糙米中的未成熟粒，对碾米的后期加工更有益，进一步提高大米的加工工艺效果。

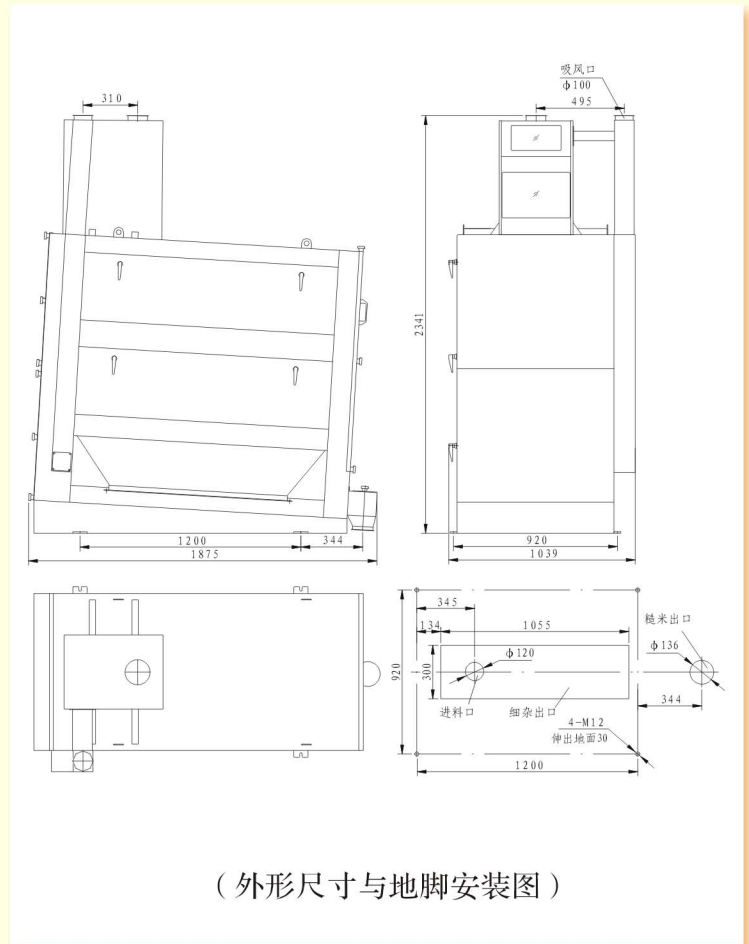

### 特点

- 采用链条传动，结构可靠，传输损失小。
- 筛网由钢板冲孔成形制成，耐用、效果好。
- 具有筛网自动清理装置。
- 设备运行平稳，振动小，并有吸尘装置。

MJXH29X6 Thickness/Width Grader applies mainly to remove immature kernels from brown rice in rice processing. Due to be more helpful for later processing, the machine improves effect for processing technique of rice greatly.

### Feature

- Driven by chain transmission with less loss, reliable construction.
- The screens are made of perforated steel plate, durable and good effect.
- Equipped with automatic self-cleaning device on screens.
- Work steadily, less vibration and also with dust collector.

## 主要技术参数

型号Type	MJXH29×6
产量Capacity t(Brown Rice)/h	5.0~6.0
动力Power kW	1.1
外形尺寸Dimension mm (L×W×H)	1875×1039×2341
机重Net Weight kg	530

### 通过ISO9001国际标准质量体系认证
